

Odd One Out

Discuss

THE BIG IDEA

There is darkness without
light.

Light reflects of different
surfaces.

What do you think this
means?

Discuss.

light
shadow
dark
mirror
reflect
reflective
reflection
opaque

LO: I know that shadows are formed when the light source is blocked by an object.

LO: I can find patterns in the way that the size of shadows change.

What is a shadow?

How could we prove that at home?

How is a shadow formed?

opaque

Key to Creating Successful Shadow Puppets

- Use a dark and thick piece of card for your characters and settings.

Make sure your puppets are bold and clear. Do not worry about minor details, concentrate on the shape and outline.

- Use a strong stick to attach to the card that you can hold.
- Use an translucent piece of material to shine your light through.
- Use a strong light source, making sure the batteries are full if they are needed.
- Frame your translucent material in order to focus your performance. Think of it as a strong, clear border.
